PROBLEM STATEMENT

Retail media advertising presents a critical bottleneck for brands, particularly small-to-medium advertisers:

- **High Resource Demand**: Requires design expertise, costly agencies, and time.
- **Complex Compliance**: Retailer rules are varied and hard to interpret.
- **Multi-Format Workload**: Creatives must be adapted for many channels.
- **Agency Dependence**: SMBs lack affordable creative support.
- **Slow Iterations**: Manual reviews and fixes slow down production.

SOLUTION OVERVIEW

Our Solution

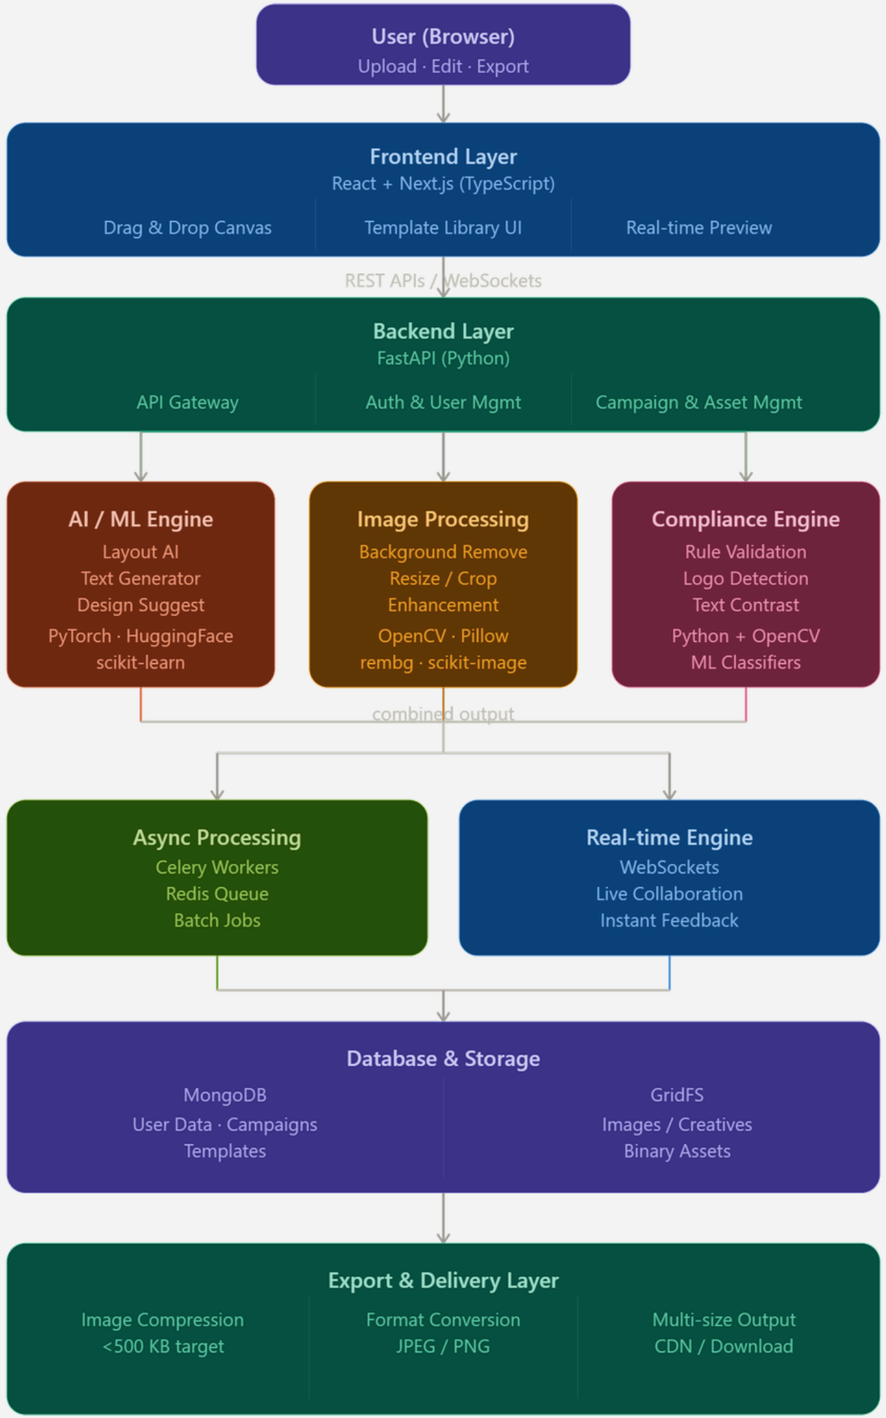
ReTailor AI solves:

- Slow creative production by generating retail-ready designs in minutes.
- Retailer guideline rejections with instant real-time compliance checks.
- Low-performing creatives through AI-recommended layouts, colors, and copy.
- Multi-format complexity with one-click auto-resizing across all platforms.
- Fragmented team workflows with built-in collaboration, comments, and versioning.

Features

- **AI Creative Builder** – Upload assets, smart background removal, and drag-and-drop editing.
- **Smart Design Intelligence** – AI layouts, color/text suggestions, and pre-built templates.
- **Compliance & Quality** – Real-time guideline checks, AI upscaling, and smart cropping.
- **AI Poster Generator** - AI Powered Doctument to Poster Generator
- **Multi-Format Export** – Auto-resize into 30+ formats with batch export.
- **Collaboration Tools** – Comments, co-editing, versioning, and campaign organization.

SYSTEM ARCHITECTURE AND TECH STACK



Category	Technologies
⬡ Frontend	React · Next.js · TypeScript
⬡ Backend	FastAPI · Python
⬡ Database & Storage	MongoDB · GridFS
⬡ AI / ML & Vision	PyTorch · Hugging Face · OpenCV · Pillow · rembg
⬡ Async & Real-Time	Celery · Redis · WebSockets
⬡ Deployment	Vercel · Render

Feasiblity

- **Ready AI Models:** Uses existing AI models—minimal R&D.
- **Modular Build:** Modular components built in phases.
- **Simple Rule Ingestion:** Retailer rules encoded easily.
- **Cloud Scalable:** Cloud-native and scalable.
- **Integration-Friendly:** Simple API integrations.

SYSTEM WORKFLOW

1. Asset Upload
Upload images, logos, brand elements
AI auto-cleans backgrounds & tags

2. Smart Layout Suggestions
AI recommends layouts, colors, placement
AI-powered design intelligence

3. Creative Editing
Drag-and-drop with layers & AI adjustments
User customizes design

4. Real-Time Compliance Che
Validates logo, contrast, spacing
Auto-corrects issues

5 Auto-Resizing & Multi-Format
One-click generation for all platforms
FB, IG, display ads, in-store screens

6. Review & Collaboration
Team comments, edits, and approves
Via shareable links

7. Batch Export
Export in all formats (JPEG/PNG/GIF/video)
With optimization

8. Campaign Organization
Group by campaign with version control
Status tracking included

VALUE PROPOSITION

- **Adaptive Compliance:** AI automatically learns retailer rules, reducing rejections.
- **Higher Performance:** Creative intelligence suggests layouts that boost ROI.
- **Faster Production:** Launch full creative campaigns in under 5 minutes.
- **Easy for Anyone:** Zero-training, guided workflows for non-designers.
- **Scalable & Future-Ready:** Modular AI adapts to new channels, formats, and retailer needs.

Benefits

Target Audience

- Small & Mid-Market Advertisers
- Retail Media Teams
- Agencies
- E-commerce Sellers
- Brands

UNIQUENESS

Adaptive Compliance AI

Auto-learns and updates retailer rules.

Instant Multi-Format Creation

Creates 30+ variants in seconds.

Performance-Aware Design:

Suggests high-performing layouts.

Zero-Design Skill Required

Simple, guided UX for anyone.

Unified Creative Intelligence Stack

All creation + compliance tools in one.

Smart Asset Understanding

Detects products, logos, and brand hierarchy.

IMPACT AND SUSTAINABILITY

IMPACTS

- **90% faster production:** minutes instead of days.
- **95%+ compliance:** near-zero retailer rejections.
- **60% lower costs:** reduced agency + design effort.
- **5× more output:** scale creatives with the same team.
- **30–50% better engagement** through AI-optimized designs.
- **80% less rework** with automated fixes.
- **3× faster launches** across all channels.

SUSTAINABILITY

- **70% less design waste** by eliminating repeated creative iterations.
- **50–60% reduced storage load** through optimized, auto-compressed assets.
- **40% lower carbon footprint** by minimizing manual processes and agency overhead.
- **80% fewer redundant exports** with smart multi-format automation.
- **90% digital-only workflow** reduces printing, rework, and resource use.

MARKET OPPORTUNITY & REVENUE MODEL

- $130B+ retail media market, growing 20–25% YoY.
- 80% advertisers lack affordable creative support.
- Strict retailer guidelines make automation essential.
- Exploding demand for multi-format, omnichannel creatives.
- Potential to be the default creative engine for RMNs.

Market Opportunity

Revenue Model

- SaaS subscriptions (Starter → Enterprise).
- Usage-based credits for high-volume exports.
- Retailer/RMN integrations via white-label fees.
- AI add-ons (DCO, video, 3D, predictive scoring).
- Template marketplace with commission revenue.
